Pets/Friends for Life has a policy that all adopted cats go to homes where they will be indoor cats only. Many of our cats have come to us from a life on the streets after they have been abandoned or lost from a previous home. We wish to ensure that these cats do not have to suffer the dangers of the outdoors again which include cars, other wild animals, dangerous plants and substances. If you are adopting a cat from us, please consider the cat's long term safety and respect our "indoors only" policy. We wish them to live a long, healthy and safe life and this can be done by keeping them indoors! \*\*\*\*\*Integrating a new cat into a household with other pets requires patience. There may need to be several days of separation and slow introduction of current pets to the new feline addition. Please inquire about practical solutions if unsure about how to add a new feline member to the household.

\*\*\*\*\*When adopting a cat from Pets/Friends for Life, our adoption fee which is \$160, includes mandatory spaying/neutering, vaccinations, de-fleaing and deworming in addition to an examination by a veterinarian. Adult cats will have been spayed or neutered upon adoption. PFFL is providing adopters with names of some veterinarians in their local area if they do not have a veterinarian. The cat's health record will be included in the adoption paperwork. Pets/Friends for Life, in good faith, adopts cats who are deemed to be in good health upon release from our shelter. PFFL, at its discretion, will continue to provide health assistance for upper respiratory infections for up to two weeks post adoption. Should a cat require health care assistance for this medical condition, adopters will be reimbursed up to \$70 for veterinarian care (examination and medication fee) for this procedure if they see a veterinarian of their choice (copy of paid invoice required). Adopters may request that PFFL provide veterinarian care for an upper respiratory infection and will be required to temporarily return/release the cat to Pets/Friends for Life so that we can provide care at a veterinarian of our choice.
